Resin Product Data Sheet

Multiple antigenic peptide resin

The multiple antigenic peptide (MAP) resins are available in octavalent (MAP8) and tetravalent (MAP4) with respect to its core molecule. Both MAP8 and MAP4 resins are based on Wang resin and are compatible with the reaction conditions for Fmoc chemistry.

Both MAP8 and MAP4 resins are based on high quality polymer and reagents. The polystyrene supports (1% DVB cross link) are available in 200-400 mesh size and substitution levels of the pre-loaded Wang resins range from 0.25-0.45 mmole/g.
