Product Data Sheet

Cat#: SP-100052-5
Description: Proadrenomedullin (12-20) (human) (AA: Lys-Trp-Asn-Lys-Trp-Ala-Leu-Ser-Arg-NH₂) (MW: 1187.41)
Size: 5 mg
Purity: >95%
Form: Powder
Store: Desiccated at -20oC.

Adrenomedullin and proadrenomedullin N-terminal 20 amino acid peptide, PAMP (1-20) originated by post-translational enzymatic processing of a single 185-amino-acid precursor, preproAM. PAMP(1-20) is found in plasma, adrenal medulla, right atrium, kidney, and brain. It is an endogenous peptide that elicits hypotension through inhibiting catecholamine secretion from sympathetic nerve endings and adrenal chromaffin cells.
